Library Management System

CO-CREATORS

MUSKAN (SG-18332)

ABHISHEK DUBEY (SG-18302)

ACKNOWLEDGEMENT

The satisfaction that accompanies the successful completion of our project would be incomplete without the mention of people whose co-operation made it possible, whose constant guidance and encouragement crown all efforts with success.

First I wish to acknowledge my sincere gratitude to my respected supervisor and guide, Mr. Vivek , who not only guided the work but also provided motivation for completion of the work. He always kept me on the right track, gave encouragement, constructive criticism, made stimulating discussion and took keen interest in course of the research. t

I also take the opportunity to tender my respect and thanks to the Library authorities of the UIET for providing me the data related to the website.

My deep gratitude and respect to the authorities of UIET, Hoshiarpur for providing me the opportunity and extending full cooperation and all-out support.

I express my heartfelt thanks to Mr. Dilip Kumar Sharma (founder of Platorm Tech Solutions) and my elder brother Mr. Pravin Lawania (Sr. Software Engineer at Protatech India Solutions Pvt. Ltd.) for their kind cooperation and gave their valuable suggestions. Last but not the least, we would like to thanks our friend and family for the support and encouragement they have given us during the course of our work.

11. REFERENCE

ABSTRACT

Library management system is a project which aims in developing a computerized system to maintainall the daily work library.   This project has many features which are generally not available in normal library management systems like facility of User login and Admin login.

It also has a facility of admin login through which the admin can monitor the whole system. It also has facility of an online notice board where students can check updated event, news and notice . It has also facility where student after logging in their accounts can see list of books issued and its issued date and return date and also students can request the librarian to add new books by filling the feedback form.

Overall this project of ours is being developed to help the students as well as staff of library to maintain the library in the best way possible .

INTRODUCTION :-

A college library management is a project that manages and stores books information electronically according to students needs. The system helps both students and library manager to keep a constant track of all the books available in the library. It allows both the admin and the student to search for the desired book. It becomes necessary for colleges to keep a continuous check on the books **d** issued and return and even calculate fine. This task if carried out manually will be tedious and includes chances of mistakes. These errors are avoided by allowing the system to keep track of information such as issue date, last date to return the book and even fine information and thus there is no need to keep manual track of this information which thereby avoids chances of mistakes.

Thus this system reduces manual work to a great extent allows smooth flow of library activities by removing chances of errors in the details. This Project is also one of that projects in which our team worked together to build a brand new website for our college library. This project is only the demonstration for the college Library Management without using database.

1.1 PROJECT AIMS AND OBJECTIVES:-

The project aims and objectives that will be achieved after completion of this project are discussed in this subchapter. The aims and objectives are as follows:

- Online book issue.
- Feedback column for students for providing new books.
- Student login page where student can find books issued by him/her and date of return.
- A search column to search availability of books
- A teacher login page where teacher can add any events being organized in the college
- Online notice board about the events, news and notice.

BACKGROUND STUDY OF PROJECT :-

Nowadays, in a highly technological society,human productivity is made more efficient through the development of electronic gadgets .Technologies are Important and helpful in everyone's life. A library is a place in which literary and artistic material such as books , periodicals , newspaper ,records are kept for reading for reference.

A library management system is made to have fast process for generating an accurate report. Library is important part of the academic sector as well as professional sectors too like, the efficiency of a library lies on how the books are arranged and how easily one can get the books of their choice. Generally, what we see today is the manual library management system Where process of operation is very much hectic .The efficiency of a library lies on how books are

arranged and can easily control all the students borrowing and returning the books.

PURPOSE

1. The purpose of this project is to provide a friendly environment to maintain the details of books and library members.

2. The main purpose of this project is to maintain easy circulation systems using computers and to provide different reports.

3. The system contains data where all information will be stored safely.

4. Through this system everyone knows how much late is their books.

5. Proper login systems are for both admin and users so that no one can open others Accounts.

OBJECTIVES :-

1. To build a system that can receive input and generate automatically output in easy way and short time to build a Monitoring system that is able to monitor and manage all library operations efficiently

2. Give an opportunity to librarians to reduce mistakes that always happen during manual method.

3. To store properly the library items in order to maintain their security.

4. To preserve details of various issues.

GOALS:-

As like of any project the very first goal is to complete the work on Time with all the functionalities working and with proper testing and bug fixings. Now coming to the others goals, the list is as follows:

1. Responsive Web Site

2. Tawk.io API

3. Google Maps API

4. Formspree API

5. Carousal

6. Accordion

TASKS:-

a) Proper Environment Setup:

Before stating the actual coding, it is necessary that we should first set up the Development Environment for the whole team. It involves installing softwares and adding Content delivery Network Links to the required sites in the project. The list is as follows:

a.1) Adobe Photoshop

a.2) ATOM Text editor

a.3) Visual Studio Code

a.4) Bootstrap 3.3 CDN links

a.5) Team Viewer

 a.6) Git Bash

a.7) GitHub Desktop

b) Frame Work building:

 Even after the environment setup we could not start the core coding because the very next requirement is to build the frame work of the website which involves things like total number of pages, layout of every single page, which functionality should work on which page and how we are going to implement it and more things.

c) Designing:

Now, after when the frame work building is completed, the next step is to make a beautiful design because whenever a coder starts the coding, he/she should not think about the design because it will ultimately reduce the efficiency of the coder. Not only this reason, design is very important for the website because everything in this world is first determined by the looks. If looks are not good, one is not going to like it and in our case it looks of our website is not good, and then visitors are not going to visit the website.

d) Coding:

This section involves the core development of the website that is the coding. As now layout and design is ready, coders can start working on the project. The most important and necessary thing for Web Developer is to build the website as is it is to the design given by the Web Designer.

e) Testing:

Now as the development of the website is completed it's the time for the Tester to start working. Testing can be done manually or automated. In our case we have done it manually .Testing is the one of the most essential part of any product based project. It involves the checking if all the functionalities are working properly or not, if all the APIs are properly fetched or not, if all the web pages are properly aligned or not, if server is working properly or not, if all the pages are linked properly or not. In short, development is incomplete without testing.

f) Bug Fixing:

No any project is completed in the first run. Every app, every website is built in several versions. After the testing definitely several bugs occurs. That bugs are then reported to the Developer Team and now it's the duty of the developer team to fix them and send to tester for rechecking. We have also done our project in the same way. Several bugs Occurs while coding that were fixed with time to time and even still now some bugs are not fixed.

g) Final Documentation:

Now after all the above steps completed, it's time for us to build a beautiful documentation of our project that contains the whole information about the Project like Objective , tasks, goals , working model , functionalities , milestone , theme, aim and many more. Documentation should be very very beautiful because it is the complete image of your project and Image must be good.

PAGES:-

1. Home
2. About Us
3. Collections
   - Books Column
4. Gallery
5. Log In
6. Penalty Form
7. Feedback

MILESTONE:-

Description	Fixed Date
Kick off	Project start date – June 4, 2019
Meetings	Total 8 meetings were held
Design	Design and layout must be completed till June 12, 2019
Basic Structure	Basic structure of the website must be completed till June 13, 2019
Functionalities	All the functionalities and APIs must be completed till June 14,2018
Testing	Testing should be done till June 20, 2018
Bug Fixing	Till June 22, 2018
Finishing	Design finishing should be done till June 27, 2018

PROJECT GROUP:-

Name	Responsibilities
Abhishek Dubey	**Frontend developer, Debugger, Testing, Implementation, Analysis and Documentation**
Muskan	**Content- Writer, Designer, and Documentation.**

Requirements:-

Description	Completed
Wire Framing	Yes
API	Yes
Environment Setup (i) Atom (ii) VS Code	Yes
Bootstrap Framework	Yes
Basic: (i) HTML (ii) CSS (iii) JS	Yes
Internet	Yes
Team Viewer	Yes
Github	Yes

Project Specification:-

|	
Website Url	abhishekdubey010.github.io/gyansagar
Reference site	library.puchd.ac.in
Color Reference	#212529
Responsive	Completely Responsive
Frontend	Well-managed

PROJECT EXPERIENCE:-

(i) Learn Time management and get to know how to tackle problems.

(ii) Group Coordination Improvement.

(iii) Improve Mistakes.

(iv) Positive and excellent experience during doing this project

1.) Home

Library

We inspire you to reach for the stars. To find, analyse, use and manage knowledge.
To build your skills for study and work. To make change.

Library History

A Library is a place where there is a huge collection of books
and other resources that is made accessible for reading and
reference purpose. Our library was **established in 2006** with
donations of **Lajpat Rai s/o Prem Saini** of Nangal Shahidan
distt Hoshairpur and his Sons **Maharaj Krishan Baldev
Krishan and Kewal Krishan**. Its Modular and functional
style fulfills a purpose of planned library.

Benefits of library

- The library Management system is simple,user-friendly and can be easily intergrated.
- The library management system provides mobile access to search the library catalog,schedules,books and resources from anywhere
- Archives Preserve historic artifacts,oral histories ,digital history projects and monographs relevant to the community, including minority groups-encourage a love of reading just by being there gives children access to books.
- It encourages interest as student's have easy access to books on hobbies, etc.
- Library offers free educational resources to everyone.

Man's Best Friend

The relation between Books and Man are like Best friends as Books always inspire man to do great things in life. Man learn alot from Books just like a good friend.
Books are not only one's best friend but also contribute wisdom.
Books gives us hope, courage and motivation.

Some *good qualities* that we can learn from good books like *barve, optimist, never give up, compassionate, thankful, helpful.*

Vision

Our University library are engaged in learning and discovery as essential participants in educational Community. We develop, organize, provide access to and Preserve Materials to meet the needs of present and future generations of students. We explore and implement innovative technologies and services to deliver information and scholarly resources conveniently to users anytime anyplace. Our library will be recognized as an accessible and exceptional center of learning, research and creativity focused on student success.

Days	Opening Hours
Monday	9:00 am - 5:00 pm
Tuesday	9:00 am - 5:00 pm
Wednesday	9:00 am - 5:00 pm
Thursday	9:00 am - 5:00 pm
Friday	9:00 am - 5:00 pm
Saturday	Closed
Sunday	Closed

Note:- Library is closed on Government Holidays.

Address

Books Column - 1st floor, opposite Auditorum

Reading Hall - 2nd floor, above Books Column.

Academic Block, PUSSGRC, Hoshiarpur Pin-146001.

HTML

<div class="acc-dropdown" style="margin-left: 20px;">

<h2 style="color:crimson; margin-left:30px;" >Library Policy</h2>

<button class="accordion"><h3>Borrowing Policy</h3></button>

<div class="panel">

<p style="padding: 20px;">All the students can borrow books from the Circulation Desk located on the 1st floor. You will need <br> your four-digit PIN and username or your Roll No. to borrow books. Standard books are borrowed <br> for 2 weeks. If books are on a reading list, they are often limited to 3-day or 7-day to make sure <br> everyone on a course gets a chance to use them. Please note that reference material, journals <br> and newspapers cannot be borrowed. Students have allowance of 4 books and they have to <br> return or renew it within 15 days tenure.</p></div>

<button class="accordion"><h3>Returning Policy</h3> </button>

<div class="panel">

<p style="padding: 20px;">Before returning the book you have to submit return request to the librarian. When you come with <br> the returning book, first you have to verified it to the librarian at the Circulation Desk. After it's <br> verification that this book belongs to the Library and was issued in your account, he will validate <br> your request. And it will be recorded that the book has been returned in your account.</p></div>

<button class="accordion"><h3>Renewing Policy</h3></button>

<div class="panel">

<p style="padding: 20px;">You can renew your loans at the Cirulation Desk or you can also renew books online by signing into <br> your account, only when you do not have any fine and the request for renewing should be within 2 <br> weeks. Please ensure that the book is returned by the new due date. You will be fined for books <br> that are overdue.</p></div>

<button class="accordion"><h3>Fine Policy</h3> </button>

<div class="panel">

<p style="padding: 20px;">It is important for all library users to be able to access the material they need. Therefore, we charge <br> fines on overdue items to encourage users to return material promptly. If the issued book is not <br> submitted on submision date,then you will be fined Rupee 2 per book.

To avoid fines:

 Check your due dates regularly and renew items on your account.

```html
<li>  Do not share your username and password to someone else - you are responsible for the items on your account.</li>

</ul>

<strong>Note:</strong> If you owe the Library more than 100 rupee in fines, you will find that you are unable to borrow any more books, or renew the <br> books that you already have.
